

SORTING MACHINES

From T&I Global Ltd

CTC SORTING MACHINES

'SUPREX' Fibre Extractor

The SUPREX works on the principle of static charge. A Robust slow speed machine available in four models. Heavy duty construction ensures uniform fibre extraction along the length of the rollers.

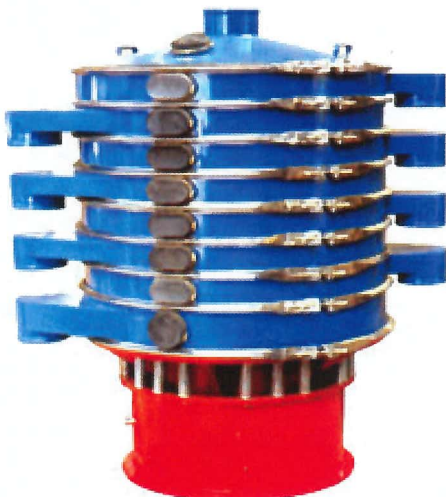

'SORTRAXTOR' Sorter Cum Fibre Extractor

The SORTRAXTOR works on the principle of static charge. A Robust slow speed machine available in four models. Heavy duty construction ensures uniform fibre extraction along the length of the rollers.

'TEAHIVE' Multideck Vibroscreen

TEAHIVE—compact multideck Vibrograder ideally suited for final CTC tea grading. Heavy duty construction with specially designed vibro motor and springs ensures trouble free and consistent performance. Stainless steel meshes supplied with correct apertures end mesh diameter to ensure homogeneous sorting.

'SORTEA' Single Tray Sorter

Robust machine single deck with 3/5 stainless steel meshes of required size and apertures. Heavy duty construction, reciprocating movement for uniform sorting.

SORTING MACHINES

ORTHODOX & GREEN TEA SORTING

'STALKEX' Myddleton

STALKEX stalk extractor is used to separate the whole leaf and broken grades. Heavy duty construction with reciprocating movement.

'TEXAN' Hexagonal Goojie

A Conical Hexagonal Sorter for Orthodox leaf. Heavy duty construction with Stainless steel 3/4 meshes for grading of different types of whole leaf grades.

'WINTEA' Winnower

WINTEA is a simple machine using the principle of density and weight to separate the light particles from heavy ones.

'ROTOTEA' Rotary Sorter

ROTOTEA is a Five Deck sorter with a rotary movement on a horizontal axis, fitted with different size of Stainless steel meshes. It sorts broken and fanning grades.
